

JETWING

America's First Name in Jet Outboard Control™

The Jet Wing provides the improved steering control and response you need in low speed situations such as: trolling, maneuvering around obstacles and in launching and retrieving operations.

The Jet Wing attaches to a Jet Drive outboard motor intake with no modifications to the motor and no drilling. Total time to assemble and install is typically 15-30 minutes.

Assembly and installation instructions, hex wrench, and all hardware is included.

Order by phone, online, or see an authorized dealer.
